RUB Wheel of Academic Law: Academic Dishonesty

Section H2 of the Royal University of Bhutan's *Wheel of Academic Law* provides the following definition of academic dishonesty:

Academic dishonesty may be defined as any attempt by a student to gain an unfair advantage in any assessment. It may be demonstrated by one of the following:

1. **Collusion:** the representation of a piece of unauthorised group work as the work of a single candidate.
2. **Commissioning:** submitting an assignment done by another person as the student's own work.
3. **Duplication:** the inclusion in coursework of material identical or substantially similar to material which has already been submitted for any other assessment within the University.
4. **False declaration:** making a false declaration to receive special consideration by an Examination Board or to obtain extensions to deadlines or exemption from work.
5. **Falsification of data:** presentation of data in laboratory reports, projects, etc., based on work purported to have been carried out by the student, which has been invented, altered or copied by the student.
6. **Plagiarism:** the unacknowledged use of another's work as if it were one's own.

Examples are:

- verbatim copying of another's work without acknowledgement.
- paraphrasing of another's work by simply changing a few words or altering the order of presentation, without acknowledgement.
- ideas or intellectual data in any form presented as one's own without acknowledging the source(s).
- making significant use of unattributed digital images such as graphs, tables, photographs, etc., taken from test books, articles, films, plays, handouts, the internet, or any other source, whether published or unpublished.
- submission of a piece of work which has previously been assessed for a different award or module or at a different institution as if it were new work.
- use of any material without prior permission of copyright from the appropriate authority or owner of the materials used".

File Upload Implementation

Objective

Create a React application with a file upload form that includes:

- Multipart form data handling
- File type and size validation
- Upload progress tracking
- Drag and drop interface

Part 1: Setup Project

1. Create a new Next.js project:

```
npx create-next-app file-upload  
cd file-upload
```

2. Install required dependencies:

```
npm install react-hook-form formidable axios react-dropzone
```

Part 2: Create Basic File Upload Form and API Route for File Upload

1. Create a new file in pages/index.js and implement a basic form with React Hook Form.
 - Implement File Validation
2. Create a new file in pages/api/upload.js.
 - Implement Progress Tracking
 - Implement Drag and Drop Interface

My codes and implementations:

https://github.com/RiteshAdhikari005/WEB_101/tree/374903e359164979ec823d9c5de0ec72ffdbcae1/file-upload

Outcome:
